Art Unit: 2632

Claims 1-9 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. **Note the format of the claims in the patent(s) cited.**

The following art rejection is based on the examiner's interpretation of the claims in view of the 112-second paragraph noted above.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Markwell et al.

With respect to claims 1-9, Markwell et al discloses a smoke detector system with radio frequency communication ability designed to communicate with other smoke detectors in which after a false alarm time delayed period ends, all detectors alert of the

presence of smoke and the room that first detected smoke further includes a visual signal (note abstract and col.5 lines 12-21).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patents 6,229,449, 5,889,468, 5,587,705 and 4,282,519 which disclose various types of smoke detector systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Lefkowitz whose telephone number is 703-305-4816. The examiner can normally be reached on Monday-Friday, 7:00-3:30.
